

Full-Stack & Career Development Program

Program Details:

- Duration: 12 months
- Goal: Equip learners to design, develop, and deploy full-stack web applications and excel in job placements

Module	Sessions	Topics
1. Python & Programming Basics	2	Session 1: Intro to programming, why Python, setup (IDE, text editor), variables, data types, operators Session 2: Control flow (if, elif, else; loops), data structures (lists, tuples, dictionaries, sets), functions, arguments, return values, basic modules
2. Front-End Fundamentals	2	Session 3: HTML5 structure, semantic tags, forms, CSS3 syntax, selectors, box model, flexbox, responsive design Session 4: JavaScript basics, variables, control flow, DOM manipulation, events, fetch API, build interactive pages
3. Databases & Django Intro	2	Session 5: Relational databases, SQLite basics (CRUD), Python-SQLite integration, intro to SQL queries Session 6: Django setup, MVT architecture, create project/app, models, fields, migrations, ORM basics, admin panel
4. Django Core Development	2	Session 7: Views (function/class-based), URL routing, templates, template inheritance, static files Session 8: Forms, ModelForms, validation, file uploads, user authentication (login, registration, logout)
5. Advanced Django & APIs	2	Session 9: Django REST Framework intro, serializers, API views, authentication/permissions Session 10: Custom user models, relationships (OneToMany, ManyToMany), signals, basic testing

Module	Sessions	Topics
6. Projects	12	Includes 8 Mini Projects and 4 Major Projects
7. Capstone Project & Deployment	1	Session 11: Build complete full-stack Django app, implement CRUD + authentication + API, deploy to platform (e.g., Render/PythonAnywhere), basic optimization
8. Placement Training	1	Session 12: ATS-friendly resumes, LinkedIn/profile optimization, mock interviews (technical & HR), portfolio building, job search strategies
